GILT-EDGED MORTGAGES

If you are looking for a safe and productive investment, your preference will probably be an 8% note of a responsible and reliable man, secured by first mortgage upon choice improved city real estate.

Such an investment when judiciously placed after an exhaustive examination of title, a conscientious appraisal of the property and a careful drawing of the papers is approved by the experience of the most conservative trustees and investors. It is also most productive.

Our experience as agents for heavy investors, both here and at the Coast enables us to place such loans to advantage.

Certain Cure for Dyspepsia

When the digestive organs are in a healthy condition, these organs extract from the food all that goes to make good, rich blood, firm muscles, steady nerves, and a sound, healthy body. When irritated, congested or inflamed, they fail to do their work properly and loss of flesh, shattered nerves, indigestion, sour stomach, flatulency and heart burn follow. Herein lies the cause of the failure of all remedies for dyspepsia heretofore placed on the market. Drugs will not and cannot digest food. They only decompose it, and decomposed food will not make pure blood or give health or strength to the body. The irritated stomach may be relieved for a time but the patient soon finds himself in a worse condition than before.

Drugs will not and cannot digest food. They only decompose it, and decomposed food will not make pure blood or give health or strength to the body. The irritated stomach may be relieved for a time but the patient soon finds himself in a worse condition than before.

TAROENA

is Nature's remedy for dyspepsia. The most obstinate case of stomach trouble will be relieved at once and a speedy cure follows. It does it in a common sense way and because it is so simple you may believe it ineffective. We have never yet learned of a case where Taroenia failed to bring about good results. Only a few days ago a customer said: "I want to say a good word for your Taroenia. I had been troubled for some time with dyspepsia and suffered greatly. Tried different remedies to no purpose. One package of Taroenia has cured me. I have learned to like the food, too." Why not try it?

KILAUEA BROKE LOOSE TUESDAY

(Continued from page one.)

has not been noted in a long time. The weather is exactly the same that occurs before the volcano outbreaks and I expect to hear any time of the Kilauea having burst forth into a big eruption.

A similar opinion appeared to be entertained by the people who lived along the Hamakua coast. Those who were acquainted with the conditions in the past, declared that an eruption of Kilauea was certain to occur. No alarm appeared however to be felt by the residents of that section.

Further news of the eruption will be received tomorrow by the Kilauea which is due from Hilo. The officers of that vessel had the advantage of being at Hilo and in closer touch with conditions at the Volcano House. They will also have additional 24 hours in which to await developments of the eruption. The reflection of the flames could certainly have been seen by the officers and various Hilo passengers of the Kilauea, and there is even a probability that they saw the actual flames if Tuesday and Wednesday nights were clear. The Hilo papers should have reports of the outbreak.

Whether the present outbreak will continue any length of time and develop into a flow of lava can only be conjectured at this time. Those best acquainted with the conditions which preface such volcanic activity express the belief that an eruption is inevitable.

Certainly sufficient warnings of impending activity have been given forth by Kilauea. There has been a marked increase in the volume of smoke from the crater, clouds of steam have been reported, twice last month earthquake shocks were felt along the Hamakua coast, and finally on last Sunday morning, the volcano gave a final warning by two explosions of gas, accompanied by clouds of sulphur and red ashes. The eruption reported today by the Kilauea's officers occurred about two days and a half after these explosions.

Professor Lyons states that lava flows are a very infrequent occurrence with activity at Kilauea. Probably not more than once in a century has there been any lava flow from Kilauea. About the only time when the lava burst forth and flowed from the side down to Puna. Ordinarily when Kilauea is active, a vast quantity of molten lava is stirred up in the crater, but the flow does not come from this quarter.

Soprano, op. 13 (piano and violin)Grieg
Lento Dolcissimo
Allegro Vace
Allegretto Tranquillo
Allegro Animato
J. A. Amme and Miss Castle.

FOR MOLOKAI BASEBALL.

At the meeting of the Honolulu Baseball League yesterday afternoon it was decided to withdraw \$1.50 from each club's deposit with the league for the purpose of purchasing baseball material to be sent to the Leper Settlement on Molokai by the steamer Lehua next Monday. J. A. Thompson was appointed a committee to see to the purchasing and shipment of the goods.

DEED OF SETTLEMENT.

A deed of settlement for the custody and control of the Spaulding Cup will be drawn up and executed by the parties in interest. This was decided on at a meeting of the Honolulu Baseball League yesterday afternoon. Early in the year J. A. Thompson, vice president of the Honolulu Athletic Club, wrote to the donor regarding the disposition of the cup and asking for information regarding the conditions governing its disposition. A reply was received from A. G. Spaulding to the effect that the cup was perpetual and advising the drawing up of a deed of conditions and the appointment of a guardian. G. W. Smith was named by Mr. Spaulding to act in the latter capacity.

The cup was presented to Honolulu by A. G. Spaulding in 1899, when he visited Honolulu with the All-American ball team which was making a trip round the world. The cup was a challenge affair to be contested for periodically and to be held by the champion nine of each season. It has been won

as follows: 1899, Stars; 1899, Kamehameha; 1899, Honolulu; 1899, Kamehameha; 1899, Crescents; 1899, Stars; 1899, Stars; 1899, First Regiment. Until last year, when the Honolulu won the championship, baseball had languished since 1887. The cup is at present decorating the headquarters of the National Guard of Hawaii.

THE NEWEST FLYING MACHINE.

Of the making of flying machines there is apparently no end. A Berwickshire gentleman, Mr. G. W. Watson, has applied for letters patent for a machine of this kind, of a somewhat novel type. He has directed the cigar or torpedo shaped elevator for one which whilst almost round, has a sharp outer edge, and he claims, with his machine and forty-nine passengers, to be able to sail straightly, angularly, or circuitously, under any circumstances or conditions, at any time. Suspended from the elevator in the usual way is a vicker car, which will contain the prime motor and passengers; and in order to avoid the necessity of such half-breadth escapes as have been experienced by M. Santos-Dumont, the inventor is provided with an automatic parachute, which will enable the car to descend gently to earth in the event of an accident to the elevator.

THE HEAT OF THE SUN.

When one is exposed to the hot beams of a summer sun, and remembers that the body which radiates this great heat is said to be a nearly 93,000,000 miles away, it cannot but conclude that that body must itself be inconceivably hot. The idea has been put forth that the sun is not really hot, but radiates some sort of energy which only becomes heat when it impinges on some material body, such as the earth. In support of this notion, it is pointed out that the higher above the earth and the nearer the sun we get the colder it becomes, but this fact can be explained otherwise. The generally-accepted doctrine among astronomers is that the sun is really hot, but how hot there is some difficulty in determining. Young, from the focal heat of burning gases, estimated the effective heat of the sun at 18,000 degrees Fahrenheit, but there have been much higher estimates. Schuch, for example, putting it at several million degrees. Mr. W. E. Willson, who has devoted much attention to this point, has just made a new determination, and puts the effective heat of the sun at 12,000 degrees F. Sir John Herschel showed that if a glacier 45 miles thick each way was continually rushing into the sun with the speed of light (186,000 miles per second) the head of the glacier would be melted as speedily as it advanced. "From a few acres of the sun's surface," says Sir Robert Ball, "as much heat is radiated as would drive continually all the steam engines in the world."

TROUBLES IN RUSSIA.

A spurious proclamation has been distributed broadcast throughout the southern provinces of Russia. This proclamation directs the peasantry, by order of the Czar, to re-divide the land, and corn which the nobles have absorbed, contrary to a proclamation issued by the late Czar, Alexander II. The peasantry on the Duke of Oldenburg's estate attempted to seize the cattle which were kept at the camp. They came into collision with the soldiers, who charged with fixed bayonets. One regiment refused to obey the order to charge. During the riots at Moscow some men of one of the city regiments refused to fire upon the rioters when commanded. In consequence, 800 men of that regiment have been transferred to the remotest of the Russian provinces. A Marine Infantry detachment at St. Petersburg has been similarly punished for not helping to repress the disturbances which recently broke out among the St. Petersburg students. The whole district between Vladimir and Moscow is in a condition of labor revolt. A revolutionary demonstration has taken place at Ekaterinoff, a suburb of St. Petersburg, at the very head of the Gulf of Finland, as a result of which the Cossacks fired upon and charged the mob. Twenty of the rioters were killed, and 49 wounded, while 150 arrests were effected.

COLLEGE BUILDINGS.

One hundred alumni of the college of the City of New York, with Edward Lauterbach as spokesman, asked the city board of estimate Friday for \$2,100,000 to erect the six new college buildings.

WIRING A KINGDOM.

The Canadian government has appropriated \$10,000 to build a barbed wire along the boundary between Montana and the Dominion extending from St. Mary's lake to the Sweet Grass hills.

ACTION NOT WORDS.

In regard to the unfortunate inhabitants of the stricken islands our motto should be "Tears for the dead; food for the living."

NEW ADVERTISEMENTS

NOTICE.

JAS. H. BOYD,

Superintendent of Public Works.

SEALED TENDERS.

Sealed tenders will be received by the Treasurer until 12 o'clock noon on Saturday, June 7th, 1902, for Territorial Treasury Notes, under the provisions contained in Chapter 52 of the Civil Laws of 1897, to the amount of \$150,000. Tenders to be in sums of \$1,000 or multiples thereof, payable in U. S. gold coin. Funds to be available on July 1st, 1902, at the Treasurer's office. Each note to be issued for the term of six months. For full particulars bidders are referred to said Act as printed below.

WM. H. WRIGHT,

Treasurer.

Approved:
HENRY E. COOPER,
Governor.

Treasurer's Office, May 19, 1902.

CHAPTER 52, CIVIL LAWS 1897.
TERM TREASURY NOTES.

Sec. 676. The Treasurer upon the approval of the Governor may issue, at par, upon public tender, to any person or corporation Term Treasury Notes in the name of the Hawaiian Treasury.

Sec. 677. The said Treasury Notes shall be issued in sums of One Thousand Dollars or multiple thereof, and shall not exceed at any one time One Hundred and Fifty Thousand Dollars.

Sec. 678. The rate of interest shall not exceed seven per cent. per annum, free of tax, and be payable at the due date of the note.

Sec. 679. The tenders for the said Treasury Notes shall state the rate of interest for gold tenders, or for silver tenders, and whether to be repaid in gold or silver coin.

Sec. 680. The term for which any Treasury Note shall be issued shall not exceed seven months.

Sec. 681. The form of said Treasury Notes shall be as follows:

No.
Hawaiian Treasury Note.
\$
Honolulu, 1902.

Received from the sum of dollars payable in U. S. gold coin on presentation of this note properly endorsed.

This loan is made for six months from July 1st, 1902, and will bear interest until fully paid from July 1st, 1902, at the rate of per cent per annum.

Registrar of Public Accounts.

Treasurer.

May 20, 26—June 2, 6.

EXECUTIVE NOTICE.

Notice is hereby given that June 11th, Kamehameha Day, being a legal holiday, all Government Offices throughout the Territory will be closed.

The 14th day of June, being the 125th anniversary of the adoption of the National Ensign by Congress, and the 2nd anniversary of the admission of Hawaii as a Territory, will be observed as "Flag Day," and the National Ensign displayed on all public buildings.

Government Offices will be closed and the public is invited to join in the observance of the day.

HENRY E. COOPER,

Acting Governor.

Capitol, Honolulu, June 5th, 1902.

PUBLIC LANDS NOTICE.

On Saturday, July 5th, 1902, at 12 o'clock noon, at the front entrance of the Judiciary Building, will be sold at Public Auction, the lease of a portion of the land of Puhaha, lying along the Government road, and opposite the School house and Roman Catholic church lots, in the district of Ewa, Oahu, containing an area of 2.70 acres, a little more or less.

Terms: 5 years.
Upset rental: \$40.00 per annum, payable semi-annually in advance.

For plan and further particulars, apply at the Public Lands Office, Honolulu.

EDWARD S. BOYD,

Commissioner of Public Lands.

Public Lands Office, June 4th, 1902.
